FEATURES

# Winshot and YOU Ready to compete!

VOLLEYBALL SHOOTING MACHINE - VOLLEYBALL SHOOTING

# What WINSHOT can do!

- **SERVING:** Winshot provides the perfect simulation for any type of serves. Serves like floater, top spin, jump serve (float jump or spike serve) are delivered with exceptional accuracy. Easy rolling along the serving line, height/angle adjustment and speed-control knobs make the Winshot easy to use, capable of realistic delivery point and ball spin. The ability to deliver an accurate ball trajectory allows you to repeat the same type of serve and pinpoint where you want your receivers to contact the ball. Thousands of reps can be delivered in your daily practices, providing maximum repetitions for faster learning of serve receive.
- **SPIKING:** Winshot is the perfect tool to simulate attacks over the net from front and back row. Bring your digging drills to the next level by providing real game situation offense and maximize repetitions.
- **SETTING:** Winshot can deliver with great accuracy any type of setting anywhere on the court.
- **MOBILITY:** The optional battery pack powers cordless operations and promotes a safer training environment. All Winshot models are provided with locking casters for easy and practical mobility around the court.
